RELEVANT EXPERIENCE

Software Engineering Immersive | General Assembly | Remote | Nov 2021 – March 2022

Completed 500+ hours of expert-led instruction in HTML, CSS, and JavaScript programming using Agile and Scrum Methodologies. As well as learning Back-End web development technologies like Node, Django and Python. Developed web applications, including:

- Nom-Nom: A content driven web app that allows users to create, update, and delete recipes. While also providing a search feature for users to browse today's most popular recipes from Spoonacular API.
 - Built with React, JavaScript, HTML5, CSS3, Sass, MUI, Emotion, Node.js, Express, Mongoose, MongoDB, Spoonacular API [[GitHub Repository](#)] [[Deployed Link](#)]
- VINT: A full CRUD web application designed for vinyl collectors
 - Built with Python, Django, HTML5, CSS3, PostgreSQL, Boto3, AWS, Amazon S3, Materialize [[GitHub Repository](#)] [[Deployed Link](#)]

Information Technology Technician | Safety Net Access | Remote | Aug 2016 – Aug 2021

- Surveyed, designed, built, installed and diagnosed issues of wireless and wired networks for hotels, restaurants, and retail environments, most times with a team but at times done solely. Assisted employees and/or customers of clients with IT-related problems between about 1-10 times weekly at their respective locations. Configured and installed numerous software and hardware components of network systems. Maintained and updated technical documentation regularly.
- The wireless networks installed allowed people to connect to the Internet via all types of devices including phones, laptops, tablets, and gaming consoles for guests. They also helped with back-of-house applications for housekeeping and engineering such as door locks and push-to-talk systems.

EDUCATION

General Assembly | Software Engineer Immersive | Remote | 2022

Bachelor's Degree of Arts in Music Business Management | Columbia College Chicago | Chicago, IL | 2016
